

W.T. Rich Company *Celebrates* 50 Years

W.T. Rich Company was established in 1968 by Walter T. Rich to provide construction services to various public and private organizations throughout the Commonwealth of Massachusetts. The firm was founded on the principals and values of its owner – namely, to operate with excellence, reliability, and integrity in all aspects of its business. Throughout its corporate life, W.T. Rich has grown from a small family business to a hundred-million dollar company employing over 70 employees. The firm has developed unique capabilities in serving the public construction market and in performing complex new construction, renovation, and historic restoration work.

Fifty years after its founding, Walter Rich still serves as the company's President and plays an active role in the day-to-day management of the business. Jonathan Rich, Walter's son, serves as the firm's CEO and Brian Santos is the company's Vice President. Under their leadership, the firm has developed an outstanding track record and an admirable reputation among owners, architects, engineers, and sub-contractors.

"W.T. Rich Company is very proud of the excellent reputation we have developed over fifty years with our clients and construction partners. That success has been built upon the capabilities, teamwork and commitment of our great employees."

Jonathan Rich, CEO
